## Math 525: Assignment 5

1. Let X, Y, and Z be square integrable random variables such that X and Y are independent. Show that

 $\mathbb{E}\left[XYZ\right] \le \sqrt{\mathbb{E}\left[X^2\right] \mathbb{E}\left[Y^2\right] \mathbb{E}\left[Z^2\right]}.$ 

- 2. Let X be an integrable random variable with moment generating function M. Show that  $M(\theta) \geq e^{\theta \mathbb{E}[X]}$  whenever  $e^{\theta X}$  is integrable.
- 3. Let p be a positive integer and  $(X_n)_n$  be a sequence of random variables satisfying

$$\mathbb{E}\left[|X_n|^p\right] \le f(n)$$

where f satisfies  $\sum_{n} f(n) < \infty$ . Show that

$$\lim_{n} X_{n} = 0 \text{ a.s.}$$

Hint: use Markov's inequality and the Borel-Cantelli lemma.
